Get your order in now for the coming Federal Tax Credit of 30% of the cost of your solar system placed in service after january 1, 2009.

Thirty-two Kaneka GEA-060 solar panels and an efficient and cost effective Soleil 2000 inverter from Samlex combine for an unbeatable solar electric system for your home or business. Power from the sun pours onto the panels and down to the inverter which perfectly matches your home and grid power needs. Feeding your household needs first, excess power is then fed backwards through your electric meter for a credit from the power company.
