

## ENPHASE ENVIRON SMART THERMOSTAT

Environ is a smart thermostat device that integrates with Enphase Enlighten software. It allows owners to manage their heating and cooling system, along with their solar system, through mobile and web-based interfaces.

Environ connects to the Envoy Communications Gateway, using the ZigBee wireless networking protocol.

### COMFORT

- Web-based climate controls & interface
- Simple & precise programming

### CONVENIENCE

- Easy installation
- Plug & Play integration

### CONVERGENCE

- Integrates with Enphase solar system
- On-screen display of solar energy production

# ENPHASE ENVIRON TECHNICAL DATA

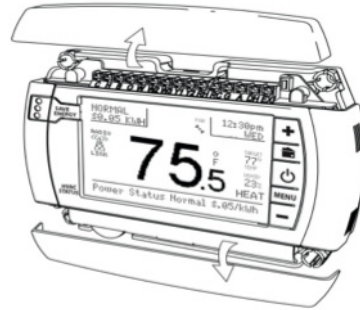

## Features

- Controllable and programmable through thermostat display, web browser or smart phone
- Simple menu-driven programming
- Large backlit display
- Precise touch screen control
- 7-day programmability
- 7 time slots per day
- Programmable to +/- 1 degree
- Compatible with multi-stage heating and cooling, and hybrid systems

## Installation Overview

1. Remove old thermostat. Connect wires to Environ. Anchor to wall.
2. Insert ZigBee USB stick in Envoy. Confirm detection of Environ.
