

WSS Small DC Cabin System

Produces up to 37.5 KwH/Month

Turn off that noisy smelly generator and run your DC lights and pump with clean quiet off grid solar power!

Perfect for Small Off-grid Cabin

The Off-grid Weekender is a complete small cabin-sized DC solar power system that can produce up to 39 kilowatt hours of electricity per month. The Wholesale Solar design crew have picked the perfect components (see below) and are ready to ship them to you. **Be sure to ask about racking and battery bank options which are sold separately.**

Expandable

With two 130 watt SunWize solar panels, this small DC off-grid solar power system assures you years of service and reliability for a cabin or RV or camping trailer. This system includes a Morningstar Charge Controller, wiring, breakers and a Midnite Combiner box that will allow you to expand by two more solar panels when you are ready.

12 or 24 volt system

As you are probably aware, some DC appliances require 12 volts; others require 24 or 48 volts. The Off-grid Weekender can be used as either 12 or 24 volts, depending on the voltage of your appliances. Call us for help sizing your battery bank: 1 (800) 472-1142.

At Wholesale Solar we have assembled hundreds of these systems. Call us today and let us design your new renewable energy system!

These are the pieces of equipment that make up this quality system

2	Sunwize SW-S130P 130-watt solar module
2	Morningstar Prostar PS-30M Charge Controller
1	MidNite MNPV-3, 3 Position Combiner Box 150V
2	MNEPV-15 15 amp DC Breaker 150VDC DIN, 13mm
50 Feet	10/2 Tray Cable 10/2 per foot THHN/THWN sunlight resistant
4	1/2" Strain Relief for #10 or #12 wire
